Susumu Otake,
Kiyohiko Narumi**

August 2012

To people who may support ‘~~No Nukes~~ Aomori Network’

The severity of the Fukushima Daiichi nuclear disaster on 11 March 2011 convinced the world yet again that we human beings CANNOT enjoy peaceful coexistence with nuclear energy. The antinuclear movement, ‘Sayonara-Nukes 10 million People Action’, started by the nine celebrities last June, has very rapidly gathered popular momentum among Japanese, and until now 7.86 million people signed a petition against nuclear energy, and an antinuclear rally drew 170,000 people at Tokyo’s Yoyogi Park. On every Friday evening thousands and thousands of demonstrators hold rallies in front of the Prime Minister’s official residence over the government’s premature decision to reactivate Oi nuclear plant in Fukui Prefecture. Thus the move for the antinuclear energy is spreading like wildfire throughout the country.

In Aomori Prefecture, ‘Sayonara-Nukes 10 million People Action in Aomori’ was organized last September, and great many numbers of people participated in this move. On March 11 this year 1,700 people gathered at the Aomori Culture Centre, and raised their voices against the nuclear energy plants in Aomori. A guest speaker at the rally, Taro Yamamoto, said, ‘We can change people’s opinions if every one of you in here gets support from 10 other people.’ And now rallies and demonstrations are being organized everywhere in this prefecture.

Let us join together to eliminate every form of nuclear energy plants from Aomori and Japan. One person can do only a little, but if we get together, we can achieve a lot! We will work together for just one cause, that is, to dismantle every nuclear facility in Aomori, and for that purpose we will form a loose network.

Please participate in our ‘~~No Nukes~~ Aomori Network’. You can join as an individual or

organization, and our network will be funded by contributions from the members. We will get to know each other and exchange information, and work for the just one cause. Our move will be united with other people in Japan who share the same opinion, and with the victims of the Fukushima disaster. We will succeed in changing the government's and prefectural policies on nuclear energy.

Once again, we would like to invite you to join our antinuclear network.
